

Tracking solutions that improve efficiency with timestamps, mileage and location records - with service you can afford.

# Service Plans

Thank you for viewing the **Tracknology, Inc.** Service Plans and Rates web page. We offer a variety of services that represent the very best in location tracking and

timestamp reporting.

Each of our tracking services consists of two components:

1. **GPS Locating** - how frequent the phone "uploads" its position to the Tracknology Server
2. **Tracking Data Report** - how frequent the Tracknology Report is "downloaded" to your desktop, or even your cell phone. Also available - receive the tracking data at multiple locations (such as your office, your cell phone, your home).

CHOICE of SERVICE PLANS		Price per Month per GPS Phone
